**Hanoi University of Agriculture
SUMMER SCHOOL PROGRAM**
You can do it, we can help

Within 4 to 6 weeks, the program is professionally designed to provide everyone an effective opportunity to experience and study on environment, society, culture and livelihoods of Vietnam.

During the course, English is used as the staple language for communication. Students who take the course will not only have a chance to experience in spectacular landscapes, but also work with knowledgeable lecturers with high command of English in friendly environment.

To meet immense demands, the program consists of a wide range of field studies with 7 optional modules for learners. In each module, student will be learned and be in prominent studying representatives.

Module 6: The Red River Delta Economy development

In general, it provides key features of Vietnam's economic growth as well as agriculture development in the Red River Delta, in particular.

Module 7: Vietnamese People and Livelihoods

No where can people find boring in this part, it provides learners with particular characteristics of the Northern food culture (its origin, development process, people's eating habits and typical restaurants).

Field trips:

In all modules, there will be two parts, one in lecture hall to have necessary overviews about the subjects of the study, and the other one in practical situation after studying theory. In class, students will be trained and familiarized by professional experts from Hanoi University of Agriculture. The student will visit and have discussion with local people in some traditional handicraft villages, historic places, national forest, agrarian systems in the Red Rive Delta. In addition, students can exchange their knowledge and culture with Vietnamese students through Module 1, 5 and 6.
